EDUCATION

University of Rochester

Bachelor of Science, Computer Science

Rochester, NY

Expected May 2029

- GPA: 3.93 / 4.00; Dean's List
- **Relevant Coursework:** Data Structures & Algorithms, Artificial Intelligence, Computation & Formal Systems, Linear Algebra w/ Differential Equations, Discrete Mathematics

SKILLS

Languages: TypeScript, JavaScript, Python, Java, Swift, SQL, C/C++

Frameworks & Libraries: React, Next.js, React Native, Expo, Node.js, Express.js, Prisma

Backend & Cloud: Redis, MariaDB/MySQL, AWS, REST APIs, WebSockets

Tools: Git/GitHub, Stripe API, Tailwind CSS

EXPERIENCE

Experts Tribe Inc.

Remote Software Engineering Intern (Mobile)

Sep 2025 – Nov 2025

- Developed cross-platform mobile features using React Native and Expo, implementing navigation flows and reusable UI components across iOS and Android.
- Optimized state management and rendering logic to maintain 60 FPS responsiveness on interaction-heavy screens.
- Collaborated through Git-based code reviews and Agile workflows to translate product designs into production-ready features.

SVKS (Korean Language Program)

Full-Stack Programmer

Jan 2025 – Apr 2025

- Built a resource-sharing platform for educators using Next.js and Prisma, centralizing digital curriculum materials and resource distribution.
- Developed responsive frontend interfaces with Tailwind CSS and integrated them with application data and resource-management workflows.

Arim Airline

Web Development Intern

Summer 2024

- Developed corporate website features using HTML, CSS, and JavaScript.

PROJECTS

Flozable.com

Founder & Full-Stack Developer

Mar 2023 – Present

- Built and grew original Flozable to ~300 users, developing backend services with Node.js, Express, and Redis for application APIs, caching, and session handling, alongside companion iOS and Android clients.
- Implemented recurring subscription infrastructure with the Stripe API and token-based authentication for secure user and billing workflows.
- Relaunched Flozable in 2026 with a new product direction, rebuilding the platform with Next.js and Supabase to simplify infrastructure and reduce hosting overhead.

WaveNotch

Creator

Apr 2026 - Aug 2026

- Built a native macOS utility in Swift that transforms the MacBook notch into an interactive dashboard for media controls, notifications, and productivity widgets.
- Integrated Spotify and Apple Music playback controls, lyric synchronization, and queue management.
- Implemented system-level functionality including global shortcuts, launch-at-login, and a plugin architecture for customizable widgets.
